

LIQUID LAUNDRY DETERGENT LB454

LIQUID LAUNDRY DETERGENT LB454 is a premium quality liquid laundry detergent which will clean in hot or cold water.

LIQUID LAUNDRY DETERGENT LB454 combines biodegradable surfactants, soil suspending agents, water softeners, builders and optical brighteners to yield excellent results under most laundering conditions.

LIQUID LAUNDRY DETERGENT LB454 is DESIGNED:

- To rapidly wet, penetrate, emulsify and suspend most fats, oils, greases, particulate and proteinaceous soils, commonly found on garments and linen used in institutional, commercial or industrial applications.
- To maintain its high performance characteristics in hot or cold water.
- To counteract the “graying” process that often occurs when fabric is repeatedly washed. Whites stay white and coloureds retain their vivid appearance.
- To maintain its high-performance characteristics when used in hard water.
- To contain only biodegradable surfactants.

CHEMICAL AND PHYSICAL PROPERTIES

| | |
|-----------------------|----------------------|
| Appearance: | Viscous, blue liquid |
| pH (1% solution): | 11 – 12 |
| Foam Characteristics: | Low-Moderate |
| Odour: | Pleasant |

DIRECTIONS FOR USE:

Fill the machine with water and then add **LIQUID LAUNDRY DETERGENT LB454** before adding clothes.

Do not pour directly on the clothes unless pretreating.

For **pretreating**, pour a little on the stain and the rest in the wash.

Check if dye is colourfast by applying **LIQUID LAUNDRY DETERGENT LB454** to a corner of the garment.

Below are the addition rates which will normally yield good results under most conditions.

| | |
|----------------------|---|
| Machine Wash: | Use 40 to 80 ml per 5 kg wash (top loader) or 40 ml per wash (front loader) |
| Hand Washing: | Use 30 ml per basin. |
| Soaking: | Use 20 ml to 5 litres of water for overnight soaking. Then wash normally. |
