

# SODIUM HYDROXIDE 46%

## LC585

**SODIUM HYDROXIDE 46% LC585** (also known as **Liquid Caustic**) is a highly caustic base and alkali in liquid form. It decomposes protein and can cause severe chemical burns.

**SODIUM HYDROXIDE 46% LC585** will neutralize acids and it will absorb carbon dioxide from air. It will give an exothermic reaction when mixed with acids.

**SODIUM HYDROXIDE 46% LC585** is widely used in industry in the manufacture of pulp and paper, textiles, drinking water, soaps and detergents, and as a drain cleaner.

### CHEMICAL AND PHYSICAL PROPERTIES

Appearance	Clear colourless liquid
Flash Point	Non flammable
Density	1.49
Odour	None
Concentration	685 gm/ Lt
