

2 PACK PAINT STRIPPER

GS711

Strong, thickened paint stripper, suitable to 2 pack paints, epoxy and polyurethane

2 PACK PAINT STRIPPER GS711 is a heavy duty paint stripper designed to remove a wide range of paints, as well as epoxy and polyurethane. It is safe on wood, furniture and metals including aluminium and powder coatings.

2 PACK PAINT STRIPPER GS711 contains activated methylene chloride to break down resistant paints such as polyester powder coatings. It contains a wax evaporation retarder to reduce evaporation of the Methylene Chloride to lengthen the contact time.

2 PACK PAINT STRIPPER GS711 is used at temperatures between 5 - 35°C . It can be applied by brushing or rolling on.

CHEMICAL AND PHYSICAL PROPERTIES

Appearance:	Clear thin liquid
pH (50% dispersion in water):	8 -10
Odour:	Solvent smell
Specific Gravity:	1.2

DIRECTIONS FOR USE

Application Rate

Use 1 litre of paint stripper per 1 – 4 square meters of painted surface.

Application:

Brush or roll on the painted surface.

Leave for 2 to 15 minutes for the paint to soften and wrinkle.

Scrape or wipe off with a rag or can be washed off with water.
