

ADCOTE LN828

Emulsifiable Rust Preventative and Lubricant

ADCOTE LN828 is an emulsifiable oil concentrate designed for use as a temporary rust preventative and light duty lubricant on ferrous metals.

ADCOTE LN828 finds applications in the red meat industry for the short term rust protection and lubrication of freshly degreased and de-rusted hooks, slides and gambrels.

ADCOTE LN828 can also be used to provide short term rust protection of ferrous components during storage. It is used in abattoirs, automotive and engineering manufacturing.

FEATURES

- Gives protection of up to 2 months (depending on exposure and conditions).
- Safe on all commonly used metals.
- Safe on operator's hands.
- Neutral pH.
- Simple and economical to use.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Oily, light yellow-brown liquid
Solubility in water	Emulsifiable
Specific gravity	0.9
Non-Volatile Components	100%
Flash point	>180°C

DIRECTIONS FOR USE:

ADCOTE LN828 must be used in hot dip tanks.

Concentration: 10 - 20% dilution in water, depending on protection required

Temperature: 60 - 70°C

Time: 30 seconds - 5 minutes

Allow parts to air dry after immersion.

ADCOTE LN828 may also be use neat by dipping, brushing or spraying and then allowed to drip dry.
