

BARREL SAFE LA1397

Cleans concrete from metal surfaces

BARREL SAFE LA1397 is a high active, liquid acidic detergent designed to remove concrete and rust from metal surfaces. It is suitable for cleaning concrete trucks and concreting equipment. It will also remove rust and hard water scale from a variety of metal surfaces.

BARREL SAFE LA1397 retains its effectiveness even in the presence of light oil films.

BARREL SAFE LA1397 contains inhibitors and passivators to reduce acid attack on iron and steel. Being low foaming, the rinse water can be reused in concrete mixes.

FEATURES

- Is a concentrated high active product.
- It removes concrete residues and rust.
- It has inhibitors to reduce attack on iron and steel.
- It is low foaming so the rinse water can be reused in concrete.

PHYSICAL AND CHEMICAL PROPERTIES

Appearance	Colourless liquid with almost no odour
pH	2
Density	1.1
Boiling Point	>100°C
Freezing Point	<0°C
Foaming	Low

DIRECTIONS FOR USE

Dilute 1 part **BARREL SAFE LA1397** with 5 to 10 parts of water and apply to the concrete.

Leave for 1 - 5 minutes and the hose off with water.

The above are general operating parameters only as subsequent rinsing and treatment will depend on the actual application.
