

VINYL RESTORER LN358

VINYL RESTORER LN358 is a liquid beautifier and protector for a wide range of synthetic and rubber surfaces.

It produces an attractive, water-resistant gloss appearance

on most types of vinyl and rubber and finds application in the automotive detailing industry. It has low toxicity.

CHEMICAL AND PHYSICAL PROPERTIES

Appearance	White opaque liquid
Boiling Point	>100°C
pH:	5.0 - 6.0
Specific Gravity	1.0

DIRECTIONS FOR USE:

1. Preclean the surface to be beautified.
2. Apply **VINYL RESTORER LN358** liberally, ensuring complete coverage.
3. Remove excess polish by buffing surface with a clean, lint free cloth.
4. Repeat steps 2 & 3 if a higher gloss level is desired.
