

RUST & SCALE LA1697

Removes rust and hard water scale from hard surfaces

RUST & SCALE LA1697 is an acidic cleaner to rapidly remove metal stains – typically rust – and scale deposits from glazed and unglazed tiles, porcelaine, masonry, concrete and stainless steel.

RUST & SCALE LA1697 contains a blend of acids, detergents, solvents and surface protective agents so that after cleaning stains are slower to return. Because it only contains moderate moderate strength acids and is less hazardous to use and is classified as a non dangerous good.

RUST & SCALE LA1697 is non corrosive on most metals and will not dull glossy tiles. It is slightly thickened so it will cling to vertical surfaces giving a longer contact time to achieve better cleaning.

CHEMICAL AND PHYSICAL PROPERTIES

Appearance:	Slightly thick clear liquid
Flash Point:	Non-flammable
pH (Neat):	2 - 3

DIRECTIONS FOR USE

RUST & SCALE LA1697 is applied neat by spray, brush or mop.

Leave for 1 – 5 minutes and spray or rinse or wipe off.
