

PARTS WASH 2 LB1612

PARTS WASH 2 LB1612 is a water-based parts washer to clean and degrease metal parts. It may be used in a hot tank, spray application, parts washer or ultrasonic bath.

PARTS WASH 2 LB1612 has low odour and is less degreasing on skin than petroleum-based products traditionally used in parts washers. Being water based it is non-flammable, so it is safer to use and less degreasing on skin.

PARTS WASH 2 LB1612 is supplied as a concentrate to be diluted with water, so it is economical in use. It is noncorrosive on iron and steel, aluminium and brass.

PARTS WASH 2 LB1612 is a quick break cleaner so oily soil will rise to the surface of the diluted cleaning solution and can be skimmed off the surface to extend bath life and make disposal easier.

PARTS WASH 2 LB1612 has a moderately alkaline pH, so is less harmful on skin than strongly alkaline or acidic products.

CHEMICAL AND PHYSICAL PROPERTIES

Appearance:	Low viscosity, blue coloured liquid.
Flash Point:	> 61°C
Density:	1.10
Foam Characteristics:	Moderate
Odour:	Low
pH (10%):	11.0 – 12.5

DIRECTIONS FOR USE

PARTS WASH 2 LB1612 is mixed with water at the rate of 10 – 15 litres per 100 litres of water. It can be used hot or cold. It is suitable for ultrasonic baths.

SAFETY: PARTS WASH 2 LB1612 is a degreaser and will degrease skin so protective clothing should be worn.

EFFECT ON MATERIALS OF CONSTRUCTION: PARTS WASH 2 LB1612 is suitable for use on ferrous, stainless steel, aluminium, brass, copper and most plastic equipment.
