

VINYL GLOSS LS554

Solvent Based Gloss with Silicone

VINYL GLOSS LS554 is a liquid beautifier and protector for a wide range of synthetic and rubber surfaces.

VINYL GLOSS LS554 produces an attractive, water resistant gloss appearance on most tyres, vinyl and rubber and finds applications in the automotive detailing industry.

CHEMICAL AND PHYSICAL PROPERTIES

Appearance	Clear, mobile liquid with a hydrocarbon smell
Boiling Point	50°C
Density	0.67 – 0.72

DIRECTIONS FOR USE:

- 1) Pre-clean surface to be beautified.
- 2) Apply vinyl gloss liberally, ensuring complete coverage.
- 3) Remove excess polish by buffing surface with a clean lint free cloth.

REPEAT STEPS 2 & 3 IF A HIGHER GLOSS LEVEL IS DESIRED.
