4. FIRST AID MEASURES

Advice: For advice, contact Poisons Information Centre, phone 131126, or call a doctor.

Inhalation: Remove to fresh air. If rapid recovery does not occur, seek medical attention.

Skin Contact: Remove contaminated clothing. Wash off with plenty of water. Keep patient warm and in a quiet place. Seek medical attention.

Eye Contact: Rinse immediately with plenty of water, also under eyelids, for at least 15 minutes. Seek medical attention.

Ingestion: If swallowed, rinse mouth with water (only if person is conscious). Do NOT induce vomiting. If victim is unconscious but breathing artificial respiration may be necessary. Seek medical attention.

Notes to Doctor: Therapy as for a chemical burn. Formation of toxic lung edema is possible. Do NOT administer activated charcoal.

5. FIRE FIGHTING MEASURES

Specific Hazards: Oxygen released in thermal decomposition may support combustion. Contact with combustible material may cause fire. Contact with flammables may cause fire or explosions. Risk of explosion if heated under confinement.

Fire fighting advice: Evacuate personnel to safe areas. In event of fire, wear self contained breathing apparatus. When in close proximity wear acid resistant over suit. Clean contaminated surface thoroughly.

Fire Extinguishing Media: Water, water spray, CO₂.

Flammability: Not flammable.

6. ACCIDENTAL RELEASE MEASURES

Isolate the area. Keep away from incompatible products. Prevent further leakage or spillage if safe to do so. In case of contact with combustible material, keep material wet with plenty of water. Dam up and soak up with inert absorbent material (vermiculite or sand). Dilute with plenty of water. Can be flushed into sewers with plenty of water.

7. HANDLING AND STORAGE

Handling advice: Use only in well ventilated areas. Keep away from heat, incompatible products, and organic materials. Use only equipment and materials which are compatible with

the product. Before all operations, passivate the piping circuits and vessels according to the procedure recommended by the producer. Never return unused material to storage receptacle. Use only in areas with adequate water supply. Containers and equipment used to handle the product must be used exclusively for that product.

Storage advice: Keep in a cool, well-ventilated place. Keep away from heat. Store in a receptacle equipped with a vent. Store in its closed original container in a bonded area. Regularly check the condition and temperature of the containers. Avoid storing near: acids, bases, metals and their salts, reducing agents, organic materials, and flammable materials.

8. EXPOSURE CONTROLS/ PERSONAL PROTECTION

Occupational Exposure Limits: TWA = 1 ppm (1.4mg/m³).

Engineering Controls: Ensure adequate ventilation.

Personal Protection Equipment:

In case of emissions, face mask with type NO-P3 cartridge. Wear self-contained breathing apparatus in medium confinement with insufficient oxygen, and in case of large uncontrolled emissions in all circumstances when the mask and cartridge do not give adequate protection. Wear protective gloves made from PVC or rubber. Chemical resistant goggles must be worn. If splashes are likely to occur, wear tight fitting safety goggles and face shield. Wear chemical resistant clothing. If splashes are likely to occur, wear a chemical resistant apron.
