

# MOSS & MOULD BUSTER

## LN1924

### Wet and Forget Moss and Mould Killer

**MOSS & MOULD BUSTER LN1924** is a spray and forget killer for moss, algae and mould, helping to remove active blooms.

**MOSS & MOULD BUSTER LN1924** also helps with the spores that may be left behind from chlorine-based moss/mould removal products.

#### CHEMICAL AND PHYSICAL PROPERTIES

Appearance:	Clear colourless liquid
Flash Point:	on-flammable
Odour:	Almost none
Specific Gravity:	1.0
pH (neat):	6.5 – 8.5
Foam Characteristics:	Low-Moderate

#### DIRECTIONS FOR USE:

Dilute 1 part of **MOSS & MOULD BUSTER LN1924** with 5 parts of water.

Spray mixture over affected area, ensuring you also cover surrounding exposed surfaces to ensure removal of spores/seeds yet to bloom.

Allow area to dry. Best to use on a dry/sunny day.

Biological growth will slowly die off and crumble away within 14 days.

For stubborn/heavy buildup, you may need to re-treat after 2-4 weeks to ensure everything has been killed.

Will work on lichens also. Product should be given two coats of diluted mixture, with 15 minutes drying time between coats. Some lichens can take longer than the 14 days to start dying off.

**Suggested application rate:** 1L of diluted mixture to 5-10 square metres of covered area.

**Note:** On surfaces where pets/animals may walk, we recommend allowing a couple hours for the product to dry and get absorbed into the mosses, moulds or lichens.
