

PHOSDET LN1048

Phosphate Bath Additive

PHOSDET LN1048 is formulated for use with phosphating systems to provide improved cleaning, wetting and to reduce drag out from baths. It gives a more even coating with improved rust resistance.

PHOSDET LN1048 improves the adhesion and rust resistance of paint and coatings to the metal. It will also reduce the crystal size and coating weight of phosphate on iron, improve the alkali resistance and reduce the hygroscopicity of phosphate coatings.

PHOSDET LN1048 has low foam. It is suitable for use in phosphating solutions, rinsing tanks and chromate seals.

PHOSDET LN1048 is suitable for Phosphate Baths, Rinse Tanks and Chromate Rinse. Use when needed to improve cleaning and wetting.

DIRECTIONS FOR USE:

Add **PHOSDET LN1048** at the rate of 200 - 400 ml per 1000 litres.
