

PENETRATING OIL LS303

Loosens bolts and lubricates and frees rusty metal parts

PENETRATING OIL LS303 penetrates rust to loosen rusty nuts and bolts and seized metal parts.

PENETRATING OIL LS303 has been formulated to displace water in confined spaces, while leaving a film of a rust preventative oil behind.

CHEMICAL AND PHYSICAL PROPERTIES

Appearance:	Light brown oily liquid
Flash Point:	40°C
Foam Characteristics:	None
Odour:	Hydrocarbon smell
pH (1% solution):	Insoluble in water

DIRECTIONS FOR USE

Apply **PENETRATING OIL LS303** directly to rusty parts using a spray, brush or squirt oiler.

Allow from 1 to 5 minutes to penetrate and free rusty parts.
